

Call for Participants

6th International Training Workshop of Waste to Energy

October 18th to November 1st, 2022, Hangzhou, China (Online)

The 6th International Training Workshop of Waste to Energy (WtE) will be conducted from **October 18th to November 1st, 2022, in Hangzhou, China (Online)**. The training workshop intends to share the advanced technology and practical experience regarding WtE development in China. It is helpful for the participants, including technicians and researchers from developing countries, to improve their skills and knowledge, as well as it can promote bilateral and multilateral international cooperation. Last 5 training workshops of WtE have been successfully held since 2016, sponsored by *Department of International Cooperation, Ministry of Science and Technology of the People's Republic of China*. 117 participants from 22 developing countries have benefitted.

Due to the challenges of the COVID-19 pandemic, the 2021 training workshop of WtE was held online, yet delivered the high-quality training maintained over these years. With the successful proceedings of the 2021 online workshop, the 2022 training workshop on WtE will be yet another success story. The workshop will have tutorials from professors and senior technical experts, covering broad topics including and not limited to theoretical knowledge and practical experience, advanced research, and current applications. The training workshop is for two weeks and has a four-hour daily session. Please pay attention to **More Information** for further details regarding the background of the workshop, previous workshops memories, training schedule as well as training contents

Participant strength is limited to **30 persons** from developing countries. Once the participants have completed all courses and been qualified for assessment, they will be awarded a certificate issued by Zhejiang University and ICCWtE, which will be mailed to the participants along with souvenirs and learning materials of the course, free of charge. Additionally, three outstanding participants will be funded to visit WtE plants with full domestic coverage of possible fees for three days when they come to China in the future.

Organizer

International Joint Research Center for Advanced Energy, College of Energy Engineering, Zhejiang University
